200m_cross_5 / frame21: +6.708 s local time equivalent
At final GNSS sample A70; positive shift is outside GNSS support; strict ENU-Up +0.629 m
Frame 21: norm 26.575 m
Along-track squared-error share 98.60%
Signed component (m)
+26.389
-3.056
+0.719
Along-track
Horizontal cross-track
Vertical-normal
Same observed candidate: error grows before frame 21
Along-track
Horizontal cross-track
Vertical-normal
Signed component (m)
Original LiDAR frame index
